stream5 PREMIUM, the package for individual needs

Because they change conventional user behaviour, online videos are revolutionising the media and advertising segment. More and more people use the Internet, not simply as a source of information but increasingly for entertainment or networking with friends. As the absolute focal point of this megatrend, online videos play an immensely important role in this context.

Large-scale media firms rely on stream5 PREMIUM. Because PREMIUM enables the realisation of all the complex and individual needs of an online video platform. Do you want integrated mobile distribution, the deployment of behavioural targeting or maybe an interface connection for video shopping? No problem at all with a PREMIUM licence from stream5.

Range

s5 COCKPIT & s5 Flash Player

s5 COCKPIT: You control, administrate and publish your videos with a central video content management system called s5 COCKPIT. This is where you can upload, edit, create channels, compile playlists and publish videos.

s5 Flash Player: To make sure that your target group gets active, it is essential that your online video platform is user-friendly and that your content is easily distributed. With the s5 interactive package, embedding, social bookmarking, Tell a Friend, voting and rating are no problem at all.
